Subject Index

- A-B-A block copolymers, 117
- Adsorption, 19, 53, 61, 73, 197
- Adsorption kinetics, 127
- Adsorption layers, 127
- Adsorption properties, 137
- Aggregate stability, 1
- Aggregation kinetics, 93
- Alkoxide, 251
- Anatase, 155
- Aninoorganosilanes, 235
- Anionic surfactants, 197
- Anisometric pigment particles, 191
- AOT surfactant systems, 11
- AOT/CTAB surfactant systems, 11
- Aqueous lead carbonate, 25
- Autocorrelation, 243

- Barium titanate, 53, 61
- Bicarbonate-specific adsorption, 25
- Bitumen, 35

- Calorimetry, 197
- Coagulation, 175
- Concentrated dispersions, 117
- Copolymers with grafted chains, 19
- Cyclic acetal-type cationic surfactants, 73

- Densitometry, 107
- Dialkyldimethylammonium bromides, 107
- Dicarboxylic acids, 83
- Dielectric spectroscopy, 243
- Dynamic light scattering, 243

- Electrophoretic light scattering, 209
- Electrokinetic properties, 19
- Electrolytes, 93
- Electron microscopy, 251
- Electrophoresis, 209
- Electrorotation, 243

- Flocculation, 175, 225
- Flow ultramicroscopy, 1

- Fluorescence techniques, 11
- Fluorine-containing surfactants, 43
- Foam stability, 167
- Fractal analysis, 191
- Fractionation, 53
- Freeze-fracture electron microscopy, 107

- Goethite, 209

- Hydration force, 175
- Hydrogen peroxide, 251
- Hydrolysed lead-adsorption, 25
- Hydrophobic interactions, 93

- Influenza virus dispersions, 1
- Insoluble monolayers, 83
- Interfacial tension, 35

- Kinetics, 61

- Langmuir-Blodgett multilayers, 83
- Lead carbonate speciation, 25
- Liposomes, 175

- Maximum bubble pressure, 35
- Micellization, 73

- Nonionic surfactants, 147

- Oil-in-water microemulsion droplets, 147

- Phosphate, 209
- Phosphatidylcholine, 175
- Polyacrylic acid salt, 53, 61
- Polyelectrolyte complex, 225
- Polymer lattices, 117
- Polymer layer thickness, 117
- Polymerization, 43
- Preparation of catalysts, 155
- Preparation of supports, 155
- Preparation of supported catalysts, 155
- Protein/surfactant interaction, 127

Quartz zeta potential, 25
Quasi elastic light scattering, 251

Reversed micelles, 251
Reversible aggregation, 175
Rheology, 117
Rotating particles, 243

SAXS, 251
Secondary potential minimum, 175
Short-life foams, 167
Silica, 19
Silica gels, 235
Size exclusion chromatography, 53, 61
Specific surface areas, 191
Standard reference material, 209

Static light scattering, 107
Sterically stabilized latexes, 93
Surface modification, 225, 235
Surface shear rheology, 127

Thermoporometry, 251
TiO₂, 251
Titania, 155
Turbidity, 147
TX35, 251

Vanadia-supported catalysts, 155
Vesicles, 43
Vinyl alcohol/vinyl acetate copolymer, 137

Zirconium dioxide, 197
